

Moline Adriance Mower

1. One-piece tubular main frame—light and strong, insures perfect alignment of shafts and mesh of gears.
2. Axle and main shaft of cold rolled steel which gives greater strength and lighter draft.
3. Crank shaft bearings are of solid bronze composition.

- This is the best material on the market. It lasts longest and gives best service. Specially placed roller bearings on axle reduce draft and wear.
4. Pawls and ratchets insure cutting power with slightest forward move of wheels—always in view of the driver. Easily disengaged, leaving only the driving wheels in motion.
 5. Gears firmly keyed to axle—least possible danger of breakage.
 6. Coupling frame hinges in exact alignment with crank shaft, both vertically and horizontally. Gives ease of motion and flexibility with least possible weight on cutter bar.
 7. Five-inch face wheels give the greatest amount of traction.
 8. Cutting parts—extra strong—fitted to produce perfect shear at every edge.
 9. Knife head guide fitted with adjustable and removable hard steel wearing plates.
 10. Alignment bar brings the cutter bars into perfect line and protects the pitman.
 11. Pitman rod—seasoned hickory with drop forged steel connections.
 12. Bar carrying spring—places weight not necessary to hold bar down upon the wheels where it is available for power.
 13. Spring draft produces more uniform and lighter average draft.
 14. Forward acting foot lever easy to operate.
 15. Levers all easily reached—insure safety of driver.
 16. Tilling lever in easy reach of the driver and guards can be raised or lowered instantly by slight rock of finger bar.
 17. Folding bar—safety and convenience in transportation insured as bar folds directly over pole.
